

Tuition Management System (TMS)

Receptionist — Detailed Role Specification

Scope: Front desk — a single branch's walk-in and day-to-day contact point

The lightest role in the system by design: the Receptionist needs just enough visibility to check people in and answer “where do I go” questions, without exposure to fee, HR, or performance data.

1. Student Check-In

Function — A student arrives at the branch

System response: Receptionist checks them in from the day's roster/appointment list; this can feed the branch's attendance/visitor log but is separate from the teacher's classroom attendance marking (Part 4 of the Teacher spec).

2. Appointments

Function — A parent or visitor arrives for a booked appointment

System response: Receptionist views the day's appointment schedule (parent name, requested teacher/admin, time slot, status) to confirm the visitor and direct them — read-only; the Receptionist cannot approve, reject, or reschedule appointments themselves.

3. Communication

- Relays institutional announcements to walk-in visitors and phone/front-desk queries.
- Does not have access to the parent–teacher threaded messaging system — that stays scoped to parents and the teachers assigned to their child.

4. What This Role Should Not See

- Fee amounts, invoices, or payment history.
- Staff performance scores, HR records, or payroll.
- Student test scores or performance trends.

Compiled from Lucaz Soft TMS PRD v2.0 (10 May 2026) and the TMS White Label MSA (effective 29 June 2026). This is a build/QA-ready checklist for this role: every function is paired with the exact system response — the validation, the success state, and the failure/edge-case behaviour.
